
Het najaarssymposium 2007 van de Nederlandse Kring voor Aardse Materialen.
1 November a.s. (13.30-17.10) Institute of Earth Sciences, Vrije Universiteit, De
Bolelaan 1085, Amsterdam.

13.10-13.30 Ontvangst /reception

13.30 Opening

13.35-14.20 Natural magnetic minerals - properties and use in geoscience.
Dr M. Dekkers (*Paleomagnetism Lab, Utrecht University*)

14.20-15.05 Synthesis of stevensites under atmospheric conditions
Prof. J.W. Geus (*Department Chemistry, Utrecht University*)

15.05-15.35 Koffie/thee

15.35-16.00 Direct observations of CO₂ induced swelling of coal, with relevance to
enhanced coal-bed methane (ECBM) production
Dr C.J. Peach (*HPT Lab, Utrecht University*)

16.00-16.25 Creep of simulated reservoir sands and coupled chemical mechanical effects
of CO₂ injection
S.J.T. Hangz (*HPT Lab, Utrecht University*)

16.25- 16.50 Let the Earth help us save the Earth; for less than
10\$/tonne CO₂ removal.
Prof. O. Schuiling (*Earth Sciences, Utrecht University*)

16.50-17.10 Presentation of W.P de Roever prijs

17.10 Borrel
